### DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, and 70-77, are drawn to the submission of a securities order to a securities exchange, classified in class 705, subclass 37.
- II. Claims 11, 25-39, 40, 41, 58, 59-69, 78-86 are drawn to the automatic execution of a buy and sell order on a securities exchange, classified in class 705, subclass 37.
- III. Claims 12-24, 42-57 and 87-89, drawn to the automatic processing of a securities order on a securities exchange, classified in class 705, subclass 37.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination III has separate utility such as claim 24, because prices emerging from a bid and ask process in a market crowd cannot be replicated through a computer automated process. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.
